February's Program: FAA Proposed UAS Remote Identification Rules and what does it mean to our hobby? to be presented by Terry Hock

President's Message - February, 2020

The 2020 Auction is in the history books. Saturday morning at the start, it looked a little bleak, but by 9 or so, the place was filling up pretty well. The numbers won't be in for a few more days, but I would say overall, it was very successful. I think a lot of folks are still trying to get used to the fact that it is no longer held at the Jefferson Co. Fairgrounds. From what I've seen on the news the past few days, it may turn out that we got out of there at a good time a couple years ago. The biggest factor behind this being a successful Auction was the club volunteers who made it happen. Under the stellar leadership of Craig Farthing and Josh Waltz, everything seemed to fall in place. Of course, we are still getting used to the new Silent Auction, and still working out a bug or two, but it has worked out very well so far, and the club has increased revenues significantly over the old "Buy it Now" system. And, no more fisticuffs!

I want to extend my thanks to each and every volunteer who helped with any aspect of the Auction. Whether you worked a couple hours one day, or worked from beginning to end both days, every minute of the time you gave is greatly appreciated. I can't name everyone personally who helped with the Auction in this column, but I do want to give some special recognition to a few people: Art Wilson, who worked tirelessly for many days preparing the computer equipment for the Auction from his new location over on the west slope, then traveling to Denver to spend two long days setting up and babysitting the aging equipment (and volunteers as far as that goes), to keep everything running perfectly. Lora Knowlton and her assistant cashier Karen Diepenbroek handled the money and kept the books straight. Thanks Karen, for not only volunteering your time to help out at the Auction, but also for all your help moving all those

Auction items in and out of your home along with Patrick O'Grady and Tom Higgins. Also, a shout goes out to Hank Diepenbroek for opening up his home and allowing us to temporarily store 70 airplanes and over 100 boxes and other items that were donated to the club for the Auction. I have no idea of what we could have possibly done with all this stuff if it wasn't for Hank's generosity. Terry Hock, went above and beyond as well, as he developed a registration system to use at Hank's place that we used over the course of two long days to get all these items entered into the Auction system electronically, thus eliminating all the time-consuming data entry on site. Another special thank you goes to Chris McGill, son of Steve McGill, who again volunteered to serve as auctioneer, and did a fantastic job. Finally, Smiley "Pit Master" Henderson, you did it again. Everyone is still talking about those onion rings! You put on a spread fit for a king! Thank you and all the volunteers for your special efforts which contributed to making the 2020 Auction a fun and successful event.

A word about the Shea Homes project... The construction of the new model homes just south of the flying field is in the final stages with a lot of activity, including Shea Homes employees, construction and landscape workers and potential buyers of the new homes. While unintended, some pilots flying jet turbine aircraft requiring a longer landing approach, may inadvertently get out a little long and fly close to, or over the model home area. Out of an abundance of caution, the North/South runway will be immediately designated for non-turbine aircraft only, (turbine helicopters excepted). Temporary signage will be posted as soon as it is available. This measure is being taken to ensure everyone's safety and to reduce the risk of an accident, which would severely compromise Jefco Aeromod'lers good standing with Shea Homes and Chatfield State Park. Jet turbine aircraft may resume north/south takeoff and landing when the new diagonal runway construction is completed, hopefully later this spring. It is the responsibility of Jefco Aeromod'lers club members to share this information with non-member jet turbine pilots, as they may be unaware of this safety requirement. We apologize for this temporary, but necessary inconvenience.

Welcome New Jefco Aeromod'lers R/C Club

January 8, 2020 Jefco Aeromod'lers R/C Club Business Meeting Minutes

JEFCO AEROMOD'LERS RC CLUB

Club Business Meeting Minutes

Wednesday, January 8, 2020

CALL TO ORDER/WELCOME: President Bud Glass called the meeting to order at 7:06pm at the Alice Terry Elementary School cafeteria at 4485 S. Irving Street in Sheridan, Colorado. There were 36 members in attendance.

PRESIDENT'S COMMENTS/ANNOUNCEMENTS: Bud Glass –

- Thanked Tom Higgins, Lee Taylor, Tom Boyce, Kimberly Miller for providing coffee and refreshments.
- Thanked Dave Hock for his time as Drawing Coordinator and thanked Johnny Wolf for stepping up as the new Drawing Coordinator.
- Thanked Larry Bickel for bringing his personal tractor to the field to help with snow removal.
- Thanked everyone who supported the club by showing up for I.C. Carb Day on January 1. Eight aircraft were in the sky at 7am.
- Welcome New Member – Stephen Wilfong: is one of Bud's students, has been flying for a few months.
- Welcome Guests – Joe Matasono: former club member, plans to join; Dave Strous – will be retiring soon, has been flying drones for not too long.

MEETING PROGRAM: Darren Robey was scheduled to present a program on large gas-powered multi-rotor commercial drones, but unfortunately had to cancel due to equipment unavailability. In lieu of the scheduled program, Bud presented a video he produced commemorating several club events in 2014, and Larry presented several photos of I.C. Carb 2020 plus a few photos of sunrise at the park including a grazing herd of deer.

I.C. CARB DAY UPDATE: Larry Bickel took spare parts of Bruce Robson's T-28 and dedicated the first flight of the year to Bruce. Tom Sarber had first in the air rights, followed by others in attendance – Bud Glass, Johnny Wolf, Bruce Ream, Pete Thompson, Tom Higgins and Debbie Wolf. Home-made green chili and hot tortillas were provided by Bud Glass.

OLD/UNFINISHED BUSINESS:

FPV Rules – A draft of the proposed final FPV rules was submitted to the park for approval on Sept 3, 2019. The Park returned a reply on Dec 30, 2019, with a couple questions and requested clarification on a point or two. Craig Farthing will finalize a reply.

Columbine High School Student Model Aviation Program (pending) – CHS is stepping up effort to get in front of students. There is much decision making behind the scenes to make this happen.

Valor Christian High School Avionics STEM Program (pending) – perhaps there will be progress in the spring.

Club Jackets – there has been interest from club members in purchasing club jackets with embroidered club logo. It has been many years since they were made available to members. Recently Bud Glass gathered information regarding new orders. In concept, a three season, high quality jacket would cost \$110 - \$130 per jacket. It would be necessary to order about 30 jackets to get the best pricing. This is only in concept for now. If interested, please let Bud know.

NEW BUSINESS:

Bruce Robson Estate & Memorial Project – Club member Bruce Robson passed away in late November. Bruce willed all of his RC belongings to Bud Glass. Bud is placing the majority of Bruce's RC items in the club auction and placing a few of the items with students in his flight school. He will be donating 100% of the proceeds from the items sold in the auction to the club to be used for general operating expenses. Bud presented a proposal to Bruce's family that proceeds from the sale of Bruce's personal household items be donated to the club and earmarked to only be used to fund a permanent memorial in Bruce's name at the flying field. The family enthusiastically agreed to the proposal. Bud plans to complete Phase III of the storage yard improvement plan, already approved by the Park, by designing and installing a carport-style roof structure between the storage shed and the container. This area will provide a protected storage area for maintenance equipment, currently stored outside and exposed to the elements. A permanent plaque will be installed on the west side of the storage shed identifying the area as the "Bruce H. Robson Memorial Equipment Storage Pavilion". Bruce's personal property items will soon be available for sale, and club members will have the first opportunity make purchases "to benefit the club". Terry Hock offered to post generic images of some of the items on the website. Anyone interested in purchasing household items, hunting & fishing equipment, furniture, etc., let Bud know.

New P.A. Equipment for Meetings – Thank you Larry Fagan for personally purchasing new P.A. equipment for the club meetings!

Club History Book Project – History Book Project committee chair Tom Elliot reported that in honor of the club's 60th anniversary, a club history book is being produced at no cost to the club. The more books that are initially ordered, the lower the price per book. Books are expected to be available in late February or March. Email terryb@quattrocommunications.com to reserve your copy.

SECRETARY'S REPORT: 2019 Secretary Larry Fagan asked for a motion to approve the December 4, 2019

January 8, 2020 Jefco Aeromod'lers R/C Club Business Meeting Minutes (Cont)

club business meeting minutes published in the January newsletter.

Motion: Jim Griffin made a motion to approve the November 6 meeting minutes as published in the January 2020 newsletter. Tom Elliot seconded the motion. All in attendance were in favor of the motion. Motion passed.

TREASURER'S REPORT: Treasurer Lora Knowlton presented the current financials. The January bank statement has not yet been reconciled. Recent revenue from membership dues renewal will be deposited tomorrow.

Donation – Knowlton also reported that an anonymous donation of \$100 had been received in the names of Bruce Ream and Larry Fagan. Larry for the tireless work he does for the club (meetings, newsletters, events, etc.), and Bruce for his diligent efforts in leading the Long-Range Planning Committee as they work with Shea Homes to develop, fund and construct the new diagonal runway.

SAFETY OFFICER'S REPORT: Craig Farthing reported that there is nothing new or different at this time.

COMMITTEE REPORTS:

Membership Report – Lora Knowlton reported that 114 club members have renewed their membership for 2020. Darrell Wiedman asked about whether a list of members will be published. Lora stated that it has been the policy of the club for several years to not publish the membership roster. This was due to past member concerns that the list was being used by some members for business solicitation purposes. If you need a member's contact info, see Lora.

Auction Committee – in absence of co-chairs Craig Farthing and Josh Waltz, committee member Lora Knowlton gave the Auction report. Both co-chairs have been attending recent local area club meetings to promote the auction. To date, 36 volunteers have signed up. We need more! Register online via the club website. Terry Hock reported that online pre-registrations are low in comparison to previous years. Please consider pre-registering now (deadline January 17) to support the club.

Field Maintenance & Runways – Bud Glass thanked volunteers who signed up for snow removal assistance: George Powers, Rick Gonzales and Patrick O'Grady.

Flight Instruction / Training – Bud Glass reported that no new students signed up this month, so far.

Long Range Planning Committee (LRPC) - Bruce Ream reported the committee met this week. They are going out for bids in Feb to attract contractors. It is anticipated that it will take approximately three weeks to get the contract finalized and executed after the successful

contractor has been chosen. The project will get under way as soon as the weather permits, providing the bids come in within the estimated budget.

UPCOMING CLUB EVENTS:

Winter Fun Fly's - Fun Fly Chair Jeff Gittelman reported that winter time fun fly's will be announced weather-permitting. At most, there may be 2-3 days advance notice based on the weather forecast. Let Jeff know if you like to be notified of future fun fly's. Jeff also asked the group what type of contests folks would like to participate in. Fun Fly info will be posted on the website as they are scheduled.

RC Auction – Saturday, January 25, 2020 – Save the date! Come on out and support the club. Information previously reported earlier in the meeting.

PROGRAMS: The following monthly club meeting programs are scheduled -

February 5th – TBD; March 4th – TBD; April 1 – Mini Auction.

COFFEE & REFRESHMENT BREAK: Coffee and refreshments will now be available at beginning of each monthly meeting.

SHOW & TELL: Dave Hock, Terry Hock and Bud Glass all presented items for member 'Show & Tell'.

DOOR PRIZES & DRAWING: Again, special thanks to Johnny Wolf for volunteering to be the new Drawing Coordinator. Also special thanks to Tom Higgins for displaying the fine quality airplane field stands that he produces in his shop. These are available to members with their name engraved on one side and the club name on the other. Some may be made available for club drawings in the future. Tom is donating \$10 back to the club for each one purchased by a member. Tonight's drawing is sponsored by HobbyTown Littleton, located near Mineral & Broadway (in the King Soopers shopping center). Door prizes (club coffee mugs) were won by Larry Fagan and Bill Neyman.

ADJOURN: Larry Fagan made a motion to adjourn the meeting. Terry Hock seconded the motion. All those in attendance were in favor of the motion. Motion carried. Meeting adjourned at 8:35pm.

Respectfully Submitted, Lora Knowlton, Secretary/
Treasurer

Upcoming General Meeting Programs

- ◦ February 5 – FAA Proposed UAS Remote Identification Rules and what does it mean to our hobby? to be presented by Terry Hock
- March 4 – TBA
- April 1 – Mini Auction

January 15, 2020 Jefco Aeromod'lers R/C Club Board Meeting Minutes

Meeting was called to order at 6:28 PM by President Bud Glass.

Bud Glass (President), Present	Lora Knowlton (Secretary/Treasurer), Absent	Hank Diepenbroek (BM), Present
Josh Waltz (Vice President), Present	Craig Farthing (Safety Officer), Present	Larry Fagan (BM), Present

President's Comments: President Bud Glass thanked BOD Members for their work and for supporting the club by volunteering to serve and work on the BOD.

Old/Unfinished Business:

- Club History Committee Project Update – Bud stated that the Club History Project is on schedule and getting close to 50 books reserved. The Club History Project Committee will meet Friday morning to review a draft version of the book.
- Valor Christian High School STEM Program – Model Aviation Pilot Program: Bud is still working with Rick Russon to get schedules worked out and set up a demonstration at their athletic field. Weather is a concern at this time of the year.
- Columbine High School Model Aviation Program – Bud received a reply from Cory Olson, he's attempting to get this program out in front of more students to see if there is any interest.
- Banner & Flyers for HobbyTown Littleton – This is the banner advertising Jefco Aeromod'lers to be hung at the store. Lora is working on the verbiage.
- Club Jackets – Bud brought two catalogs of jackets for the BOD members to look over. There are many designs, colors and constructions to consider. The BOD did like a couple that Bud had earmarked for review. They seemed to be of quality construction and were an all-weather design. Bud will see if he can get samples.
- Newsletter advertising – Policy & Vetting. Bud stated that board members should get their input to Lora. Specifically, what kind of advertising would, or would not be appropriate for the Club's newsletter?

New Business: There was no new business.

Secretary's Report: Larry Fagan requested a motion for approval of the December 18, 2019 BOD meeting minutes as published in the January, 2020 newsletter. Josh Waltz made a motion to accept the minutes as published. The motion was seconded by Craig Farthing and the motion carried.

Treasurer's Report: Lora Knowlton was absent so there is no Treasurer's report.

Safety: Craig Farthing had no report.

Committee Reports:

- Auction – Co-Chair Craig Farthing distributed an updated list of volunteers. Craig and fellow Co-Chair Josh Waltz discussed logistics of auction set-up. Art Wilson will bring the computer equipment that he has in his possession and Lora Knowlton will bring the remaining computer equipment. After the auction, Josh will take possession of several pieces of computer equipment, while Lora will again take the remaining. Also discussed was the handling of the large number of donated items this year. It was decided to set up a separate registration number for them to differentiate them from sale items from individuals. Handing of the buy-it now and silent auction portions of the auction were hammered out. The buy-it-now price will continue to be the minimum silent auction bid price.
- Membership Report: Lora was absent, so no report.
- Field Maintenance & Runways – Bud Glass reported that a George Powers & Steve Neiley signed-up for the snow removal volunteer list.
- FPV Rule Committee – Craig Farthing received a response from the park on December 29. He has reviewed the park's concerns and will reword the proposed rules. Craig will run the reworded rules through Bud, to be submitted to the park.
- Flight Instruction / Training – Bud Glass reported no new students.
- Long Range Planning Committee (LRPC) – Bud reported that the LRPC is getting lots of interest and commitments to bid the new runway from more contractors than last fall.
- Brick Program – Hank Diepenbroek reported after February 1 he will have more time to address the brick program.

Events: No events are scheduled between now and the Warbirds and Classics Over Denver, June 12 to 14. Fun-Fly events may be announced on very short notice depending on the weather.

Programs:

- February – TBD
- March – TBD
- April – The entire meeting will be devoted to the Mini-auction.

A question came up about adding an optional history and background question on the membership form. This

Member Showcase – Lee Taylor

I was born in Durango Colorado. At age six my father passed away and we moved to Sterling, Colorado to live with my mother's family. I started first grade in Sterling and graduated from Sterling High. After two years at the University of Colorado I enrolled in the Northern Illinois College of Optometry in Chicago and obtained my Doctor of Optometry (O.D.) degree.

In April of 1960 I married Elizabeth "Betty" Rauch. She didn't tell me until we'd been married for five years that on our first date she said to herself "If I marry him I will be Elizabeth Taylor". We have two sons Brad and Greg but alas no grand kids.

I served two years in the U.S. Army at a small Station Hospital in Germany. I ran the eye clinic doing an officer's job as an enlisted man for one year and worked in the out-patient clinic for six months. My MOS (military occupation specialty) never rose above corpsman (bed pan jockey) and I was discharged with the rank of corporal.

It's that time again! DUES, DUES, DUES

All 2019 memberships expired on December 31 with the club's new fiscal year. Membership invoices were mailed out to all current members in early December - as a reminder it's time to pay your dues. You will be able to renew and pay online. If you want to renew online, go to the club website at

www.jeffcoeromodlers.com/join

If you have any questions, please contact Lora Knowlton, Membership Coordinator at 303-973-1209 or CoCoug@aol.com.

I was always attracted to mechanical things such as Lincoln Logs, Erector Sets and thoroughly enjoyed my electric train set. In fifth grade math class we had a classmate that was a whiz. He finished his lesson in a flash and then pestered the rest of us. The teacher was a genius and made him a bargain that if he kept up his work he could move to a corner of the room and work on his model airplane. Seeing this I asked if I could too? I never got to mine as soon as Jack did but fell in love with Comet stick and tissue building.

I am one of the eight charter members of the club which was formed in 1961. I have flown rubber power (all you could do during WW II), gas and towline free flight, gas control line and a little RC. As a quirk of fate I got interested in free flight helicopters while in the Army in Germany.

During the Navy Nats I competed in the copter event in the 1960's for nine consecutive years and came out on top five times. I also entered a copter in the free flight scale event one year and finished fifth against fixed wing models. Then they stiffened the rules to only fixed wing craft.

My greatest success has been designing and developing my own copter designs and stabilizing mechanisms. This worked best by making only one small change (and a couple really significant ones) at a time.

My aunt Helen always made me feel good by saying "you can tell a genius by how messy his work space is." My assortment of tools probably can be seen in almost all modelers' spaces. I sure love my Dremel tool, soldering iron and band saw. I think a bit of balsa wood must run through my veins since I have inhaled enough of its dust.

The kinship with other club members is great and has been one of the highlights of my existence!

January 15, 2020 Jefco Aeromod'lers R/C Club Board Meeting Minutes (Cont)

would be useful for finding volunteers whose skills might be useful for club projects or endeavors. Hank made a motion to add the question to the membership application form. Josh seconded the motion which passed unanimously. A board member will be in contact with Membership Coordinator Lora to let her know that this needs to be added to the application.

Motion to Adjourn: A motion to adjourn the meeting was made by Craig Farthing and was seconded by Hank Diepenbroek. The meeting was adjourned at 7:34 P.M.

Respectfully submitted, Larry Fagan (in absence of Lora Knowlton, Secretary/Treasurer)

Riding on a Wing & a Prayer

Jefco Aeromod'ler's 60th Anniversary Book of Unforgettable Moments

... a beautiful, 40-page, high quality, hardcover coffee-table book that captures the untold stories about the people and places of flying club #176, one of the earliest chartered clubs among the Academy of Model Aeronautics (AMA) over 2,500 member clubs.

Early 1960s Jefco Aeromod'lers Club pilots with their airplanes at Lakewood flying field

60TH ANNIVERSARY

This commemorative book has hundreds of photos and thirty member interviews which capture an exciting and historically accurate chronology of the **Early Days, First and Second Fields, Chatfield Aerodrome and Flying Events** from the early 1960s to today. Learn about the eight legendary founding members whose dream and hard work to create a flying club 60 years ago took flight and has grown to be one of Colorado's premier clubs for model airplane enthusiasts!

The book is being compiled, written and designed at no cost to the club. The early-reservation discounted price for members will be approximately \$35 per book. We anticipate a March, 2020 delivery date, and you will not be billed until February. Support your club and reserve yours today!

Bill Neyman won the other Jefco Mug door prize

Turbine Flyers – ALERT

Recently it was announced that a temporary flight restriction (TFR) was in place at the flying field, prohibiting jet turbine aircraft from taking off or landing on the existing North/South runway. This TFR was issued out of an abundance of caution, in order to assure the complete and total safety of the general public, Shea Homes sales staff and employees, and the contractors working on the new model home site.

This was an intelligent, conscientious and responsible decision made by club management to put measures in place that will prevent an accident with serious and unintended consequences that could compromise the good standing of Jefco Aeromod'lers RC Club with Shea Homes and Chatfield State Park. We cannot put our neighbors at risk.

This TFR does not affect the East/West runway, as it remains open for jet turbine aircraft use. We appreciate everyone's cooperation during this period of temporary inconvenience until the new diagonal runway is completed and fully operational (and open to jet turbine aircraft).

Sincerely,
Bud Glass, President

Coffee and refreshments will be available before the general meetings. Meetings will still begin at 7:00 P.M.

It was a beautiful sunrise.

Safety Spotlight Submitted by Craig Farthing

Know your Boundaries.

It is everyone's responsibility to know the boundaries of the Chatfield State Park Aerodrome and to fly within those boundaries. These boundaries are identified on the

large map located at the kiosk just east of the pavilion. Please be kind to our neighbors to the South. The boundary stops at the fence on the south end not at the trees. Avoid flying over the new camp ground registration office located on the west end of the field.

Jefco Aeromod'lers General Information
